

The Galileo *Digital Curriculum Platform* developed by ATI delivers easy-to-use tools for educators seeking to incorporate existing curriculums and lessons, develop new curriculum and lesson plan content, and share and modify curriculums and lessons online. The platform offers a seamless, integrated approach to the delivery of differentiated instruction and assessment of student learning.

Assessment Integrated with Instruction

Data from integrated purposeful assessment of student learning is available to inform decisions regarding the next instructional offerings and possible modifications of the curriculum itself.

Innovative Builder Tools for the Digital Age

Curriculum builder tools support the inclusion of multimedia instructional content within courses, units, lessons and activities.

Ready-to-Implement EngageNY Curriculum

The platform offers direct access to EngageNY curriculum and curriculum resources in English Language Arts and Mathematics. The Common Core-aligned curriculum contains Math and ELA units and lesson plans for grades K-8 and high school curriculum including content for ELA 9th-12th grade and Algebra I, Algebra II, Geometry, and Pre-calculus.

Access to Popular Resources

The platform enables searching for and scheduling popular instructional resources including those from KHAN ACADEMY®, LearnZillion, EngageNY, and ATI prebuilt *Instructional Dialogs*.

A Cost-Effective Solution for Up-to-Date Curriculum and Lessons

The *Digital Curriculum Platform* with access to EngageNY curriculum and curriculum resources is included in the per-student Galileo K-12 license fee. The dynamic platform provides curriculum lessons in addition to accommodating local district curriculum choices, teacher-designed lessons, and changing district and educator needs.

Interactive Instruction and Real-Time Feedback

Schedule and implement engaging, multimedia online instruction combined with assessment containing technology enhanced (TE) items which can both assess and expand student knowledge and skills. Student responses to selected-response and TE items that do not require teacher grading are immediately scored and feedback is provided to the student to guide learning.

Parent Engagement

Share with parents important information via the integrated *K-12 Student-Parent Center* including information on student learning, curriculum, assignments, and instructional resources for home use.

*KHAN ACADEMY® materials are also available for free at www.khanacademy.org.
