Event Description:

Tucson, AZ - Assessment Technology Incorporated (ATI) is issuing an invitation to take part in creating new directions in standards-based educational interventions by participating in the Educational Interventions Forum hosted by ATI, in collaboration with nationally recognized scholars in education and Promethean, an international innovator in educational technology, and WestEd, a leader in education and development and in comprehensive school assistance.

Elevating student achievement is among the most important challenges facing our nation in its effort to maintain and enhance our competitive edge in a rapidly changing world. It is our view that this challenge will be met most effectively by grass roots initiatives drawing on the innovations of all of the stakeholders in the educational community. We invite you to help us initiate and maintain a national dialog on this important issue through your participation in the Forum and in the ATI Town Hall Blog (townhallblog.ati-online.com).

The insights gained through the Forum will be published in Forum Proceedings. The Proceedings will promote a dialog fostering continuing collaboration toward the goal of elevating student achievement to new levels.

Onsite attendees will gather to hear from and talk with experts in the fields of intervention management, intervention technology, and intervention research. Onsite participation will provide the opportunity to participate in the design of and subsequent implementation of interventions using ATI online intervention design, intervention monitoring, intervention evaluation technology and Promethean Flip Chart and response pad technology. Onsite participation is designed to enable districts to produce a series of intervention portfolios that meet local needs and that can be shared nationally. The creation of the interventions comprising these portfolios will be informed by district needs. Onsite participants who are not currently ATI clients will be offered a limited free trial of Galileo K-12 Online for use in educational intervention. **Registration is free and required** to reserve your space in the Forum.

Online participants will have the opportunity to view onsite presentations, via real-time streaming video originating in either Arizona or Massachusetts. They will also have the opportunity to submit questions and comments to onsite presenters during question/answer periods available for each presentation. Finally, online participants will have online access to the findings from the body of evidence-supported interventions initiated through the Forum. **Registration is free and required** for access to online participation.

To register <http://www.ati-online.com/2009Forum.html> **or for more information**, visit <http://www.ati-online.com/ati/ATIForum.html>, call a Field Services Coordinator at 1.877.442.5453, or e-mail Forum@ati-online.com.

Company Description:

Assessment Technology Incorporated through Galileo K-12 Online provides an easy-to-use, fully integrated educational management system that combines the strength of research and the power of innovation to assist educators in promoting student mastery of local and state standards. Galileo's patented technology provides customized benchmark, formative, interim/end-of-course, curriculum-based, and placement assessments. Galileo reporting tools coupled with curriculum and instructional dialog tools make it possible to continuously link information about student learning to instructional planning and teaching to promote standards mastery.
