Galileo® Pre-K Online | Electronic Management of Learning

Providing a complete assessment, curriculum, and reporting system

Highlighted Features

Galileo® Pre-K Online from Assessment Technology Incorporated provides preschool educators and other stakeholders a research-based assessment, curriculum, and reporting system. The system reflects early childhood state standards, school readiness goals, and the Head Start Early Learning Outcomes Framework and links planning, individualization, and program enhancements.

New Galileo Pre-K Assessment and Curriculum Fidelity Tool

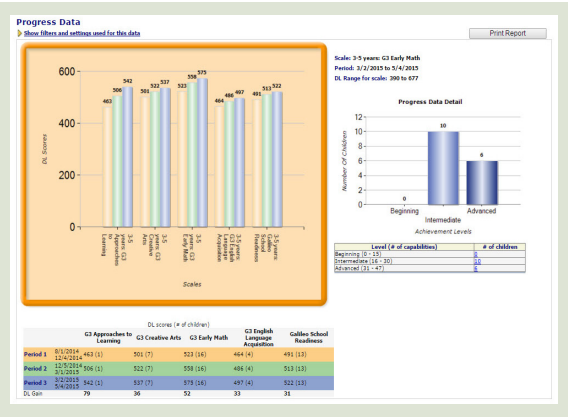
The Galileo Pre-K *Assessment and Curriculum Fidelity Tool* helps programs ensure consistent, effective implementation of Galileo Pre-K. The tool provides resources to assist programs in supporting, supervising, and monitoring Galileo curriculum and assessment use and is available to all clients at no additional cost.

Galileo G3 Assessment Scales Aligned with Head Start Early Learning Outcomes Framework

The Galileo G3 scales are aligned with, and reflect the scope and intent of, the Head Start Early Learning Outcomes Framework for children ages birth through 5. The reliable and valid scales form the basis for the comprehensive Galileo curriculum and the integrated Galileo assessment tools by defining research-based and empirically-based developmental sequences in five age ranges, birth to 8 months, 8 to 18 months, 18 to 24 months, 2 to 3 years, and 3 through 5 years.

Include Your Custom Scales in the Outcomes Analysis Report

The Galileo Pre-K *Outcomes Analysis Report* supports assessing children using multiple criteria and can now be generated for client-created assessment scales. The report enables programs to analyze progressive data for one or several assessment scales over multiple time periods. The report may include aggregated or disaggregated data for an entire program, center, class, or at the individual child level.



Select multiple scales, more than three time periods, and include selected centers or classes in a single Outcomes Analysis Report.

Galileo School Readiness Scales in Both English and Spanish

Galileo *School Readiness Scales* are reporting tools that provide reliable assessment of children's development to inform educational decision-making. Users can easily share child development goals and progress with families of program participants using the scales available in both English and Spanish.

Spanish At-Home Activities and Resources for Parents - Now Enhanced

Galileo includes hundreds of suggested at-home activities in both English and Spanish that are designed to facilitate fun educational experiences for families to share with their children. Each activity aligns to one or more of the knowledge areas identified within the Galileo G3 scales. These activities will help children achieve key capabilities that may increase school readiness leading to a more successful educational path.

Free Learning on Demand Professional Development Sessions - Both Live and Recorded

All Galileo users can benefit from our PD Learning on Demand training sessions. New sessions are regularly added and cover a wide range of subjects. Popular topics include "Are Your Children Ready for School?," "Galileo Parental Toolkit for Spanish-Speaking Parents," and "Entering Ongoing Observations." Join live sessions, or once completed, access recorded sessions any time from the Galileo *Help* files.
